MD for forensic medicine is a three-year full-time course, which requires an internship in a medical facility. This program is structured into six terms. The **Doctorate of Medicine Forensic Medicine** curriculum is taught by highly-qualified doctors who have already passed the MD entrance examination conducted by the Medical Council of India or one of its state medical councils. Some reputed universities may conduct an entrance exam to ensure the right applicants. The syllabus for forensic medicine and toxicology varies by college or university.

The course focuses on the medico-legal responsibilities of a forensic doctor. The curriculum emphasizes criminal investigations, toxicology, and legal procedures. Candidates must be highly-skilled, capable of setting and conducting inquiries, and be leaders in their field. After completion, graduates may enter a number of areas of science and medicine. These careers range from becoming a forensic pathologist to working in large private detective agencies. Forensic medical professionals are essential in the field of criminology and can work in forensic laboratories, autopsy centers, and legal investigations.
