

## Program Outcome

- **PO1:** Identify historical trends, recent advances, and the horizons of psychological knowledge.
- **PO2:** Students can choose to be psychologist, counsellor, psychotherapist, psychometrics, academicians and statisticians.
- **PO3:** Students can enhance their skills in organizational behaviour and can aspire to be Human Resource professionals.
- **PO4:** Students will pursue higher studies in related fields including clinical, health, and organizational psychology.

## Programme Specific Outcome

- **PSO1:** By learning to formulate case histories, students will be encouraged to reflect on a range of human experiences and probable life situations, likely to be encountered by them in the professional field of their choice.
- **PSO2:** Develops effective communication by training them with the techniques of rapport building.
- **PSO3:** Prepares students for the transitions from learning to working professionally.
- **PSO4:** The course will be geared towards helping potential students develop a self-reflexive relationship with themselves and to enter the challenges of young adulthood in a more free flowing, vibrant & alive manner.
- **PSO5:** To learn the application and contextual interpretation of data from psychological measurement.
- **PSO6:** Use psychological principles to generate solutions to personal, social, organizational, and societal problems.
