

## About B.Sc (Microbiology)

---

Sandip University offers a Bachelor of Science degree with a specialisation in Microbiology. The program runs for three years and six semesters. Students who choose this program acquire in-depth knowledge of a variety of microbiology topics. Students graduating from Sandip University's Bachelor of Science in Microbiology are taught genetics, cell remodeling, metabolism, biochemistry, cell biology, genetic biology, food microbiology, and more. The program is structured so that relevant priority is placed on these microbiological topics. Sandip University has excellent laboratories with state-of-the-art facilities to enable all students to put their theoretical knowledge into practice. Sandip University is one of the best scientific universities in Maharashtra. All programs offered by Sandip University are created after careful consultation between the university's experienced faculty and industry experts. This collaboration helps students receive a competency-based education that prepares them for the job market. All programs offered by Sandip University are further enhanced through workshops, seminars, guest lectures, industry visits, fieldwork, and many such academically relevant activities. At Sandip University, students are also encouraged to participate in extracurricular activities to ensure their full development.
