

A Bachelor of Science (B.Sc) in Anaesthesia and Operation Theatre Technology is an undergraduate degree program designed to prepare students for careers in the field of medical care, specifically focusing on the perioperative care of patients. The B.Sc. Anaesthesia Technology Course is a three-year degree program designed to equip students with the necessary knowledge and skills to become proficient in the technical and scientific aspects of anesthesia care. The program's focus on advanced training in the latest technologies in anesthesia specialty is intended to ensure that graduates are up-to-date with the latest advances in the field. Upon completion of the program, graduates will be well-prepared to competently assist anesthesiologists and surgeons, particularly in high-tech anesthesia techniques and surgical theaters. With their specialized training, graduates will play a vital role in determining the quality of healthcare provided to patients. They will be able to use their knowledge of the latest technologies in anesthesia to provide high-quality care and ensure the safety of patients during procedures. B.Sc. Anaesthesia Technology and Operation Theatre Technology Course is an excellent program for students interested in pursuing a career in anesthesia technology. It provides a strong foundation in the technological and scientific aspects of anesthesia care, preparing graduates to make significant contributions to the healthcare industry.

OBJECTIVE:

The objective is to impart the basic Anesthesia knowledge, technical skills and its application in the health care delivery system.

Overview

Curriculum

Department of Dermatology, Venereology and Leprosy (DVL) is a specialized medical program that involves teaching clinical, research and prevention of diseases and conditions that affect the skin, hair, and nails. The program typically takes three years to complete and requires candidates to hold a Bachelor of Medicine and Bachelor of Surgery (MBBS) degree or equivalent. The program curriculum consists of both theoretical and practical training, with candidates required to complete clinical rotations and attend lectures and seminars. During the course of their training, Department of Dermatology, Venereology and Leprosy (DVL) candidates learn how to diagnose and treat a wide range of :

- Skin diseases like psoriasis, eczemas, lichen planus, tinea
- Diagnosis and management of Sexually transmitted Infections like chancroid ,syphilis etc
- Cosmetic dermatology procedures such as Microneedling, Platelet rich plasma therapy(PRP), Vitiligo surgery, chemical peels, radiofrequency ablation of verrucae and acrochordons etc.
- Various diagnostic procedures are also carried out by the department such as skin biopsy, , KOH mount, Gram and giemsa staining.
- MD candidates also learn nail biopsy and slit skin smear for leprosy.

After completing the MD in Dermatology program, graduates can pursue a career as a dermatologist in both private and public settings. They can work in hospitals, private clinics, or start their own practice. They may also choose to specialize in a particular area of dermatology such as pediatric dermatology, cosmetic dermatology, or dermatopathology.
