## Executive MBA

The Executive MBA is an intensive two-year post-graduate programme in management, exclusively designed for middle and senior-level professionals. This programme is a specialized programme that arms the practising executives with knowledge and skills to excel in today's rapidly changing and competitive global business environment. The programme will be conducted in blended mode (online and offline). The offline mode consists of classroom teaching and campus immersion programme in IIM Kashipur campus. The online mode will be conducted through interactive digital conference platforms. The participants bring in their diverse experience to the classroom and work on real-world and live projects. The programme actively explores ways to enable participants to apply concepts learnt in the classroom to their workplace. In summary, this programme will seamlessly transition you to bigger and successful leadership roles.

## One-Year Vs. Two-Year Programme

For executives who wish to pursue a certificate programme for one-year, we offer Executive Post Graduate Certificate in General Management. The programme offers learnings similar to the Executive MBA programme but the programme excludes the elective courses which are offered in the Executive MBA course structure.
