

Master of Management Studies

Course Information

Jamnalal Bajaj Institute Of Management Studies Offers a 2-year full-time management programme "Master in Management Studies". The M.M.S. Course at JBIMS covers the major areas of business and management, with a strong emphasis on the entrepreneurial as well as the managerial skills. This programme not only concentrates on a variety of questions faced by management specialists but also focuses on decision-making from a management perspective. The Course duration of two years is divided into four semesters along with a summer internship project(s) of 8-12 weeks between the second and the third semester in the months of May, June and July. During the second year of the degree, the students will have to specialize in a field of their choice. Areas of specialization offered in this 2-year full-time programme: Finance, Marketing, Operations, HR and Systems.

Students who enrolled & successfully completed a master's degree in management studies have a comprehensive understanding of business & management and get introduced to a great number of career opportunities in different fields such as Management, Finance, Marketing, Consultancy, Operations & Supply Chain, HR & many more.

Intake

150-160 Students

Selection Procedure/ Admission

Students who intend to pursue a Master of Management Studies (M.M.S.) degree must pass an entrance examination administered by the respective authorities.

For taking admission in this programme, applicants must crack the MAH-MBA CET Exam successfully in order to be considered.

The selection of Students for M.M.S. programme is conducted through the common admission process i.e. CAP Rounds; carried out by DTE, Maharashtra.

Programme/Course Framework

The Course duration of two years is divided into four semesters. The first and the second semester is same for all the students enrolled in this programme. After summer internship project(s), students choose their intended area of specialization i.e. Finance, Marketing, Operations, System and Human resource. All of the disciplines taught here place a strong emphasis on dynamic, practical, and industry-relevant knowledge and skills.
