The objective of the course is to provide a thorough knowledge of economic theory and guide students to understand solutions to the issues related to the economy. It also trains students about economic modeling and prepares them to lead change for the country's growth and social issues. Many corporate sector firms hire economists to conduct research and assist them with setting up business cycles and policy changes. Various forms of opportunities are available for a graduate to complete this course. You can become a Market Analyst, Economist, Human Resources Manager, Finance Analyst, Operations Manager, Business Writer, and more.

level to help navigate challenging times.

4. Develop communication skills for public speaking, communicating, and leading.

LEADERSHIP POSITION IN THE NEW ECONOMY OF INDIA

This refers to the acquisition of skills and knowledge necessary to take on leadership roles in the rapidly evolving economy of India. These skills include but are not limited to strategic thinking, decision-making, team-building, communication, problem-solving, adaptability, and resilience. These skills are crucial for advancing their career in India's competitive business environment.

LEARN MATHEMATICAL AND STATISTICAL TECHNIQUES

This involves studying and applying mathematical and statistical methods to analyze and interpret data. These skills are highly sought-after in many industries, including finance, technology, healthcare, and government. Some examples of mathematical and statistical techniques include calculus, probability, regression analysis, and data visualization.

Careers

Upon completing the program, students will have a comprehensive understanding of the nature and construction of vital economic data. They will be skilled in dealing with complex datasets and deriving policy implications using different descriptives alongside inferential analyses. They can analyze the effects of different internal and external economic turbulences using microeconomic and macroeconomic models. Additionally, students will gain familiarity with India's economy, different policies, and their implications for the Indian and world economies. These skills and knowledge will equip students with the necessary tools to make informed decisions and contribute to the development and growth of India's economy.
