OVERVIEW

B.Sc(IT) is an undergraduate course in Information Technology. The duration of Bachelor of Science in Information Technology[B.Sc.(IT)] is three years, divided into six semesters. The course provides sound practical skills addressing problems which arise from computer systems and applications. The Course produces employable IT workforce that will have sound knowledge of IT that can be applied to develop and customize solutions for Small and Medium Enterprises (SME).

The B.Sc(IT) course aims at inculcating essential skills as demanded by the global software industry through interactive learning process. The objectives of the programme are to provide sound academic base from which an advanced career in Information Technology can be developed. This also includes team-building skills, audio- visual presentations and personality development programs.

It also provides an opportunity to pursue a career in computer application for non-maths background students.
