students with a profound understanding of the principles of Economics and its multifaceted applications in the contemporary world. The program encompasses a vast spectrum of topics, encompassing micro and macroeconomic theory, econometrics, international economics, public policy, economic history, and environmental economics. The program strengthens the quantitative and analytical skills of the students by training them to use state-of-the-art statistical software E-Views, SPSS, R-studio, and Python. The students are individually cared for and supported by the Economics faculty, who have received their Ph.Ds. from the top institutions in India and abroad. To promote holistic skill development, students are encouraged to take Minor courses in Statistics and Computer Applications.

The program is furnished with highly interactive classes, which continually challenge students to be involved in their overall development. This helps build communication bridges and explore international opportunities in today's global world. The course aims to provide a supportive and stimulating environment to help students reach their full potential.

Program Outcomes

The Economics curriculum at DIT University offers students the opportunity to explore the core theories of economics along with economic data analysis. The program is designed to train students who aspire to pursue higher education in economics and public policy. The curriculum also focuses on building the required skills for students looking to be employed in research, consultancy, and analytics - such as economics, business, market, and policy analysis.

Prospects:

- Pursue a master's degree from any top institution in the World.
- Appear for examinations conducted by various Government bodies and the Reserve Bank of India
- Analyze and interpret data to recommend public policies.
- Use financial data to forecast prices and the economy.
- Jobs as
 - o Economic Analyst
 - o Market Analyst
 - o Policy Analyst
 - o RBI Grade-B Officer
 - o RBI Assistant
