Minimum 55% marks in aggregate or equivalent for general candidates and 50% for SC or St candidates.

There is no age limit for studying MSc Nutrition.

**Entrance based admission:**

Students are required to crack the respective examination of a college or university to get admission in the course.

After successfully appearing for the test, the college or university announces the result and releases the merit list of shortlisted candidates.

Passed students then need to go through the college-wise admission process.

Allotment of seats to the candidates is the final step, and after that, candidates are required to deposit the fee for the course and enrol in the specific academic session.

**Benefits of MSc Nutrition**

This **postgraduate program** comprises various fields like foods, Nutrition, diets, and many more areas. This course is purely based on food quality, nutrition management, and metabolisms. Students are taken through a study of food compositions, the quality and safety of food, the ability of metabolism relationships, use of nutrients in the foods by the human body, and advanced understanding of the influence of exercises and so on. So, this course can be taken as a combination of various fields.

**Future Scope of MSc Nutrition**

After completing the MSc Nutrition programme, graduates can choose to work or continue their education. We've compiled a list of popular post-course training opportunities.

An IDA-recognized hospital will accept MSc Nutrition and Dietetics graduates for a six-month traineeship.

If you have a knowledge of nutrition, you can continue pursuing a Ph.D. in that profession. A wide range of organizational innovation and underlying values will be usually taught, allowing them to gain a deeper understanding of the subject matter.

This course gives wonderful job opportunities in many firms, and other attractive offers also knock on the door of individuals who have passed the degree of Masters.
