M.A. Previous (Psychology)

Paper I

Marks 100

Philosophy of Psychology

Objectives:

1. To familiarize students with the paradigmatic issues involved in the development of psychology as a discipline.
2. To help students to develop a critical appreciation of basic issues and scientific enterprises.
3. To introduce the alternative voices in the discipline of psychology.

Content

1. Historical Origins of Psychology as Science: -
 - Paths of scientific psychology- Human Science Tradition Psychology of adaptation, Psychoanalysis, Physiological Psychology.
 - Issues: - Crisis in Psychology Due to Strict adherence to experimental Paradigm.
2. Indigenous Psychology: -
Introduction to -
 - Geeta, Vedanta, Buddhism, Sufism and Integral yoga.
 - Academic Psychology in India: - Pre- Independence, Post Independent era.
 - The colonial encounter
 - Lack of distinct disciplinary identity.
3. Western Perspective: -
 - Greek heritage, Structuralism, Functionalism, Gestalt, Psychoanalysis, Behaviorism, Humanistic Existential, Cognitive revolution.
4. Aspects of Knowledge Paradigm: -
 - Positivism, Post- Positivism
 - Social Constructionism
 - Existential Phenomenology-Paradigmatic Controversies.
 - The Primacy of Self-Knowledge and Well- being in India Psychology.

**M.A. Previous- Paper IIInd
(PSYCHOLOGY)**

Marks 100

**CONTEMPORARY PERSPECTIVES
ON COGNITIVE PSYCHOLOGY**

Objective:

The course introduces the students to recent developments in cognitive science and psychology. It aims developing critical and analytical skills in understanding complex mental processes.

CONTENTS

1. Foundation and Approaches

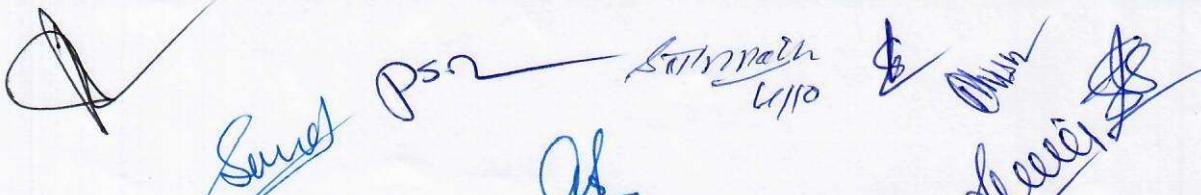

What is cognitive science? Multidisciplinary endeavors: Place of cognitive psychology in cognitive science: Models of cognition and mind; The architecture of cognition; Connectionist and neo-connectionist models; Constructivist approaches; Mental representation; Mindless; Theory of cognition; A1 and holographic models.

2. Foundation and Reasoning

Conditional reasoning Rules vs models Distinctive reasoning; Relational inferences: Syllogistic reasoning; beyond syllogism; Rationality in reasoning; Reasoning as decision making; Theories of Prepositional reasoning; Rationality, non-rationality and everyday reasoning; Biases in human reasoning; Selective processing, confirmation bias, effects of content and context; Self knowledge; Thinking as parallel processing; Models of creativity; Intelligence vs Wisdom.

3. Memory

Role of memory in cognition; Symbolic, pictorial, and lexical; Memory as constructed and activity; Real world and everyday memories; Memory For intention, action and plan, places, events, people, personal experiences, knowledge and metaknowledge,

A series of handwritten signatures and initials are written across the bottom of the page. From left to right, they include: a stylized signature, "PSR", "Girish", "Om", and "Sreelekha". Below these, there are additional initials and names, such as "Sam", "Ab", and "Deepti".

expertise, discussion, thought and dreams; Social influence on memory; Implicit memory and recollection; Understanding amnesia.

4. Attention and Perception

Intentional, divided and selective attention; Conscious and unconscious processing From attention to attentional behavior; Attention: Neurophysiology of attention; Computational models of attention; Acquisition of knowledge structure; Pattern recognition; Expert knowledge; Implicit knowledge and learning.

5. Metacognition

From social cognition to metacognition; Illusion of knowledge and metaknowledge; The feeling of knowing as a judgement; Progress in metacognitive social psychology;? Connectionism and metacognition.

RESEARCH METHODOLOGY AND STATISTICS

Objective:-

This course aims at familiarizing students with various designs of experiments along with statistical procedures.

Contents

1. Experimentation in Psychology:- Purpose Nature of variables Techniques of experimental manipulation Impact and control in experiment. Sources of bias. Ethical issues in psychological research.
2. Brief Introduction to Statistics in Psychology :- Measures of Central Tendency and Dispersion. Normal Probability Curve. Parametric test: t-test. Correlational Methods: Product Moment, Rank Order, Biserial, Point biserial, phi coefficient.
3. Experimental Design:-Single-subject designs, ANOVA [Factorial], Randomized Block Design, Repeated Measures Design, MANCOVA, ANCOVA.
4. Non-Parametric Statistic:- Multiple comparison among Mean, DMRT, Newman Keuls, Tukey, Protected “t; Non-parametric tests of ANOVA; Sign test; U Test.
5. Latin-Square Design:- Greco- Latin Square mixed design; Crossover design.

A handwritten signature in blue ink, appearing to be a stylized 'S' or a similar character, is located at the bottom right of the page.

Paper- IVth
SOCIAL PSYCHOLOGY

MARKS 100

Objectives:

- : This course aims at enabling students to
- 1. Appreciate how individual behavior is influenced by social and culture context.
- 2. Understand how social behavior can be analyzed in terms of social-psychological theories.
- 3. Realize how social-psychological knowledge can be used in solving social problems.

CONTENTS

1. Historical Background

Growth of social psychology as a modern discipline; Traditions of social psychology: psychological, sociological, societal and applied; Culture and social psychology; Relationship other social sciences.

2. Theoretical Perspectives

Cognitive dissonance, social comparison, reactance, attribution, social identity; Field; Psychodynamic; Symbolic Interactionism; Social constructionism, Social representation; Socio-biology.

3. Understanding Relationship and Group Processes

Human relationship; Social motivation; Pro-social behaviours; Aggression; Social emotions; Group dynamics: Meaning of group, group formation, decision and problem solving; Insights from small group research; Group level behaviours.

4. Social Cognition and Influence Processes

Person perception and social cognition; social power and political processes; Mass Media, communication and attitude change in Indian context; Persuasion, propaganda and brain washing; Leadership styles and effectiveness.

[Handwritten signatures and initials follow, including PS, S. M., Dinesh, and others]

5. Applied Social Psychology

Inter-group relations; Poverty; Gender issues; Social Institutions; Problems of social change; Population issues; Social movements.

M.A. FINAL

There shall be four theory papers and one paper of practicals, carrying 100 marks each. Paper number I & II are compulsory and paper IIIrd&IVth are to be chosen from the list of optional papers.

Paper- I Research methodology- Non Experimental design and Correlational Methods.

Paper- II Personality Theories

Paper- III & IV- Optionals-

Selected any two of the following options from each paper- IIIrd and IVth.

Paper III-

- a) Psychopathology
- b) Peace conflict and International relations
- c) Stress Emotions, coping & health.
- d) Political Psychology.

Paper IV-

- a) Clinical & community Interventions.
- b) Behaviour Modification.
- c) Cross Cultural Psychology.
- d) Foundation of Applied social psychology.

Paper- V :Practicals

[Handwritten signatures and initials]

MA Final (PSYCHOLOGY)

Paper-I

Marks:100

ADV. RESEARCH METHODOLOGY NON-EXPERIMENTAL DESIGN AND CORRELATIONAL METHODS

Objectives:-

This course deals with research methods that are employed in field settings. Correctional analysis techniques with numerical examples will be discussed. Also, Familiarity with multivariate techniques is expected.

Contents

- 1- Paradigms of Research:- Quantitative, Qualitative, Mixed methods approach, Methods of research: Observation, Survey [Interview, Questionnaires], Experimental, Quasi-experimental, Field studies, Cross-Cultural Studies, Phenomenology, Grounded theory, Focus Groups, Narratives, Case studies, Ethnography.
- 2- Non and quasi-Experimental Designs: - One group designs; Non-equivalent control group designs, Introduction to time series design, Interrupted time-series designs, Multiple time-series design.
- 3- Correlational Designs: - Cross-sectional and Longitudinal design; Panel design.
- 4- Newer Social Methods: - Life history; Meta-analysis; Simulation and games; Evaluation research.
- 5- Advanced Correlation Methods: -Measures of association; Multiple regression (Linear, Stepwise), Factor Analysis Techniques and implication.

PERSONALITY THEORIES

Objectives:

This course helps the students to understand the diverse psychological strategies to analyse personality.

CONTENTS

1-Introduction

The scope of the study of personality. The concept of personality, personality theories, personality assessment. the credibility of bogus personality assessments, personality change.

2-The Psychoanalytic Strategy

Introduction to the psychoanalytic strategy. Major themes in psychoanalytic theory. Development of Personality: Issues in the psychoanalytic theory personality development (Jung, Adler, and Sociological Schools). Object Relations (Mahler's object relations theory). The organization of personality, ego psychology; Liabilities of psychoanalytic strategy.

3- The dispositional strategy

Introduction to the dispositional strategy: the assessment dispositions: self-report personality inventories and their uses and limitations. Trait and type approaches: Allport's Trait Approach Typologies, Heritable aspects of personality, Cattell's Trait approach Eysenck's type approach Personality traits of adults: The Five Robust Factors or the super trait Converging evidence Needs and Motives: the concept of motive, Murray's

need theory. The need for achievement-The McClelland-Atkinson Approach; power: The anatomy of a motive.Liabilities of The Dispositional Strategy.

4. The Phenomenological strategy

The Phenomenology and Phenomenological strategy:

Maslow's Hierarchical theory of Human Motivation. Kelly's theory of personal constructs – Liabilities of Phenomenological Strategy.

5. The Behavioural and cognitive strategies

Radical and Methodological Behaviourism, Social learning theories: miller and Dollard and bandura Mischel's cognitive – behavioural theory.

Liabilities of the behavioural strategy.

[Handwritten signatures and initials are present at the bottom right of the page.]

PSYCHOPATHOLOGY

Objectives:

1. To acquaint students with various manifestations of psychopathology.
2. To impart knowledge and skills required for diagnosis of psychopathological conditions.
3. To introduce students to the different perspectives and models regarding the causation of mental illness and dysfunctional behavior and to highlight the contribution of these approaches to the pathogenesis of a wide range of mental and behavioural disorders.

CONTENTS

1. Classification systems in Psychology.

W.H.O. classification (ICD-10) and multiaxial systems (DSM-IV-R): Theoretical background /approaches to psychopathology (i) Psychodynamic; (ii) behavioural; (iii) Cognitive; (iv) Phenomenological; (v) Biological, and (vi) Socioculture; Diagnosis-Purpose of diagnosis, reducing undesirable variability; multiaxial model, evaluation of diagnostic system; Models for the description of abnormal behaviour; Medical psychodynamics and learning in psychopathology Recent advances and research methods in psychopathology.

2. Theories and Models of Anxiety Disorder.

Panic, Phobic, OCD, Post-traumatic, GAB,(b) Somatoform disorder, (c) dissociative disorders, Schizophrenia and other psychotic disorder, Schizophreniform, Schizoaffective, delusional,

brief psychotic disorder; Mood disorder; Depressive unipolar and bipolar disorders.

3. Psychophysiological Disorders

Theories: Personality disorder, CHD, Asthmatis, Allegry, Eczema, Itching Rheumatoid Arthritis, Peptic Uleer, Diabetes, and Menstrual disorders.

4. Disorders

Adjustment disorder, (b) Impulse control disorders; (c) substance related disorders, (d) Eating disorders and sleep disorders; Sexual and gender identity disorders.

5.Organic Mental Disorders

Changing views of brain function and dysfunction .
Neuropathological consideration; Common syndromes.

CLINICAL AND COMMUNITY INTERVENTIONS**Objectives:**

This paper focuses on the contribution of different theoretical approaches to psychology to the area of clinical and community interventions and aims.

To train students in different approaches to counseling and psychotherapy.

To help develop a balanced view of the various therapies and the practical techniques employed.

To help students familiarize themselves, gain knowledge and work towards developing an integrative perspective.

CONTENTS**1. Therapeutic Interventions**

Nature, goals and course of interventions. Objectives and approaches.

Distinction between Psychotherapy and other orientations (helping, case work, counseling and educational approaches). Basic psychotherapeutic techniques: Guidance; reassurance persuasion:confession and catharsis: externalization of interests. Common features of interventions.

2. Therapeutic Relationship

The helping process. The Counsellor as a person and as a professional.

Counsellor characteristics, and values, Issues faced by therapists, dealing with demanding and committed clients, accepting slow results, learning our limits, transference, establishing realistic goals.

3. Skills of a Therapist

BS 2 IMPACTS 4110 ✓ MHN ✓ S. JEWELL ✓ D. JEWELL

Listening, Leading, summarizing, confronting, interpreting and informing
Crisis Intervention: Competence building: Primary, secondary and tertiary prevention, Ethical issues in Psychotherapy: Therapist responsibility, Client therapist relationship, ethical issues; Special reference to marital and family therapy. Group work and cultural perspective.

4. Types of Therapy

Supportive therapies: Millieu therapy, Inspirational group therapy, Creative art therapies and structural integration; Reeducative therapies: behaviour therapy (Operant, Wolpean and Modeling Procedures); Cognitive approach: Ellis, Goldfried, Meichenbaum, Goodman and Beak; Client-centred Psychotherapy and stages of therapy; Reeducative group therapies : Mechanisms of group psychotherapy with a focus on group processes, types-including psychodrama, group therapy and family therapy (including marital therapy); Reconstructive therapies; psychoanalysis: Psychoanalytically oriented psychotherapy- Process and techniques with a focus on transferences, resistance, working through and the interpretive processes; Existential analysis: Gestalt therapy; Transactional analysis; Holistic approaches to therapy: yoga, meditation, bio-feedback and others. Extratherapeutic healing aids: Spontaneous cure; placebo effect; Indian Traditions of Healing; The place of mental illness in Indian cosmology.

5. Counselling

Basic features; counseling relationship process; Training in Social skills Programmes for social problems; Life Skills Training, Social Skills Training and anger control. Heterosocial skills training including sexual skills and competence; programmes for special populations; juvenile offenders; in an institutional setting, parents as mediators in the social skills training of

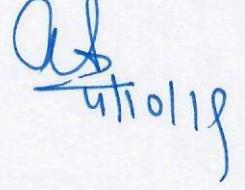

children. Social skills for women and elderly; programs for the severely impaired; social skills training with psychiatric patients and mentally retarded.
